Stan,

EPA approves the alternative method with the condition that the reason for the substitute method is made a more clear.

I have just left my branch meeting and should be on-site this afternoon at the river if you need to discuss further.

Mike, do you think EPA will have any objections to this modification of procedure (it specifies what types of minerals make up the armor stone)?

Stephanie and Mike,

CH2M HILL wishes to approve the attached request from Great Lakes for an alternative method of Petrographic Examination of the Armor Stone. CH2M HILL has determined that the attached method will provide similar results to the Final Design's requirement for petrographic examination by ASTM C 295.

Please let me know if EPA has any questions or concerns.

Gary,

Please find attached a RFI and supporting documentation for consideration of an alternative method of Petrographic Examination which the lab feels is more suitable to our intended use of the stone. Please review and comment. Thanks
